

Please REJECT NAB's petition 04-160!!!! You can't know how useful XM Satellite Radio's Instant Traffic and Weather has helped me navigate the surface streets and freeways of the greater Phoenix area. Instead of getting the usual chatty, laughy innane blabber the FM stations offer I can turn to the XM Instant Traffic and Weather for the Phoenix area and find out where the traffic back ups are in order to avoid them. With all due respect, I pay for the services XM Satellite Radio offers me and it should not be up to the National Association of Broadcasters to dictate to me what is useful information or just the USUAL non-informative "talk to hear myself talk" blather that the FM Disc Jockeys offer up. Please REJECT the NAB's petition 04-160 or you will be doing us all a great disservice.

Thank you,
Sharmon Sherraden
